

Product Designer UX/UI

Eduardo Azuolas

+55 (11) 97481-9840 eduardoazuolas@gmail.com São Paulo, Brazil [linkedin.com/in/eduardo-azuolas](https://www.linkedin.com/in/eduardo-azuolas) eduardoazuolas.com.br

SUMMARY

Product Designer for digital products, building on ten years of physical and spatial product design. Recent freelance work includes a B2B finance dashboard redesign that cut time to first action by 35% and lifted 30-day retention by 18%, and an ordering app now in use by a small food business. I work end to end — research, interaction design, prototyping, usability testing, visual design and design systems — close to stakeholders and engineers. Case studies at eduardoazuolas.com.br.

PROFESSIONAL EXPERIENCE

Product Designer UX/UI

Freelance — São Paulo, Brazil | Remote | 08/2025 - Present

- Redesigned a B2B finance analytics dashboard for a client under NDA around role-based insight cards: -35% time to first action, +22% feature adoption and +18% 30-day retention in the 60 days after launch.
- Designed a pickup-first ordering app for a home bakery, now in use: two connected apps (customer and baker) across 12 screens plus 5 edge states, with each order synced to both Google Calendars.
- Run discovery before development: 10 user interviews, an 80-user survey and prototype tests of three directions on the dashboard project.
- Create user flows, wireframes, prototypes and scalable UI in Figma with Auto Layout, components and variants; the dashboard alone ran to 17 screens, covering three role-based homes, drill-downs, a mobile companion and five system states.
- Build component libraries and documentation engineers can build from: 17 components for the dashboard and 18 for the ordering app, with every text color passing WCAG AA.

Senior Designer, Physical Product & Spatial • Visual Communication Coordinator

Live Arq. Promocional — São Paulo, Brazil | 06/2024 - 07/2025

- Led 30+ end-to-end projects, from discovery and requirements through prototyping, validation, and delivery, working across design, production, and technical constraints.
- Introduced iterative prototyping and usability validation, creating 2+ prototypes per project and catching issues earlier in the process.
- Redesigned the validation workflow, reducing revision cycles by 22% and improving overall project efficiency by 30%.
- Coordinated stakeholders and cross-functional teams, managing priorities and design decisions across multiple concurrent projects.

Senior Designer, Physical Product & Spatial

057 Comunicação Visual — São Paulo, Brazil | 01/2019 - 06/2024

- Delivered approximately 20 projects per year, translating client requirements and business objectives into functional, user-centered solutions from concept through production.
- Led discovery, requirements gathering, prototyping, usability testing, and design validation on selected projects, collaborating closely with clients and technical teams.
- Planned and moderated 5+ usability tests per project using data to identify friction and validate design changes before implementation.
- Improved project delivery efficiency by approximately 25% through earlier validation, iterative feedback, and clearer requirements.

Product Designer

SP Laser — São Paulo, Brazil | 03/2016 - 12/2018

- Designed physical and visual product solutions for laser engraving and machining, translating client needs into practical, production-ready concepts.
- Applied User-Centered Design while balancing functionality, aesthetics, materials, manufacturing processes, and technical feasibility.

Research Project & Scientific Initiation

Centro Universitário Senac — São Paulo, Brazil | 01/2014 - 12/2014

- Conducted qualitative research on urban accessibility, exploring the experiences and needs of people with disabilities.
- Translated research findings into actionable design requirements using User-Centered Design and accessibility principles to inform more inclusive solutions.
